Separating Hype from Reality: Everything a business leader needs to know about the Metaverse

Join **Lyron Bentovim** - President & Chief Executive Officer at The Glimpse Group, **James Watson** - Chief Marketing Officer at The Glimpse Group, and **Jan Pflueger** - Founder & Advisor at advisXR for a four hours closed-door working session devoted to the Metaverse impact on business and what you need to know to get ready for it.

Closed-Door Working Sessions are in-depth discussions of the issues that matter most.

Metaverse – Hype or Normality?

There is still a lot of interpretation and rumor of what the Metaverse could be and if or when it will happen. We will share and discuss what the Metaverse means right now, deliver the background and give insights into dependencies which could be relevant for your business.

The Metaverse basics

As the Metaverse involves multiple areas and not only technical solutions we want to give an overview of what the relevant parts are and which aspects you should be aware of. It is about content and creation processes, analysis of needed building blocks, available platforms and other considerations like data standardization.

Technology and Ecosystem

As there are a lot of areas and manifold use cases, the necessary infrastructure and solutions are different for each business. We will cover aspects of how AI and other relevant technology will be integrated and relevant measures to be considered for implementation. In an open dialogue we shed light on the technical requirements, dependencies and discuss the strategies to establish a sustainable ecosystem for your business.

LYRON BENTOVIM PRESIDENT & CHIEF EXECUTIVE OFFICER AT THE GLIMPSE GROUP

JAMES WATSON CHIEF MARKETING OFFICER AT THE GLIMPSE GROUP

JAN PFLUEGER FOUNDER & ADVISOR AT ADVISXR

Infusing Identity into Real-Time Interactions: Strategic and Economic Impact

Don't miss **Eve Maler**, Chief Technology Officer, ForgeRock, keynote!

Consumers demand immediacy in digital interactions, and increasingly in physical-digital settings as well.

Digital identity has become a strategic asset, enabling you to protect, connect, and respect them continuously.

From social communities to autonomous and augmented vehicles all the way to fully virtualized banking and healthcare, find out how putting identity at the center of your connected services and devices solves challenges of security, privacy, experience, and connectedness in ways you may never have guessed.

ForgeRock helps people simply and safely access the connected world. Eve Maler is ForgeRock's CTO, leading its Labs team investigating and prototyping innovative approaches to solving customers' identity challenges.

If you are interested in giving a keynote, curating and hosting your own round table or working session, reach out to Jean-Michel.biottiere@realtimeconference.com.

Join the RealTime Society Now!

Participate in the Real-Time Live Program at SIGGRAPH 2023!

SIGGRAPH 2023 wants you to submit to its Real-Time Live! program

Submissions are due on April 04, 22:00 GMT, which is just over a few days away!

SIGGRAPH RTL! showcases innovative and captivating real-time work and is one of SIGGRAPH's most highly anticipated events of the year. SIGGRAPH 2023 is particularly special as the conference's 50th year anniversary gathering in person in Los Angeles.

For inspiration, you can watch last year's in-person live show.

The conference is seeking cutting-edge, real-time work in a wide range of areas: video games (commercial, explorations, applications), virtual reality, augmented reality, artist explorations or applications, military or industrial simulations, research projects (physics, graphics, modeling, etc.), descoscene, filmmaking technology, scientific visualizations (medical/physical science, astrophysics, astronomy, etc.), machine learning, and anything that is interactively controlled, rendered in real-time, and repeatable for a live audience.

Interested? Create a new submission at the [submissions portal](#) to provide an overview of your piece or project

Please direct any questions to Cem Yuksek, SIGGRAPH 2023 Program Chair, via email at RTL-s2023@siggraph.org.

RealTime Economics Summit and RealTime Society are brought to you by RTC, the RealTime Community.
