RESET is an initiative of RTC – The RealTime Community. Business Intelligence for those who see disruption, AI, and real-time as fuel—not fear

RTES becomes RESET

The RealTime Executive Summit on Emerging Technologies

Originally launched as the RealTime Economics Summit (RTES), this initiative has now evolved into **RESET**—The RealTime Executive Summit on Emerging Technologies.

With this shift, we are broadening the focus: from a gathering of economic and financial experts to a cross-industry think tank for decision-makers and innovators across sectors.

RESET expands the conversation beyond economics, embracing the full spectrum of emerging technologies—from real-time systems to AI—and welcoming executives navigating transformation at the highest levels.

The rapid evolution of technology has always pressured industries to adapt, but the combined surge of real-time capabilities, the AI tsunami, and unprecedented global disruptions—pandemic fallout, strikes, natural disasters, economic instability, and political uncertainty—has created a level of strain never seen before.

Entire sectors—automotive, retail, media & entertainment, and beyond—are on the brink.
 Businesses are facing a critical decision: adapt intelligently or risk irrelevance.
 Simply speeding up outdated workflows is no longer enough.

It's time for a **RESET**

Goodbye RTES. Welcome to RESET: The Future of Executive Strategy
